JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY
ANANTAPUR ANANTAPUR-515002 (A.P) INDIA

ACADEMIC REGULATIONS COURSE STRUCTURE
AND
DETAILED SYLLABI
OF
MASTER OF TECHNOLOGY
IN
STRUCTURAL ENGINEERING

(Regular Two Year P.G. Degree Course (Applicable for the batches admitted from 2012-13))
Academic Regulations For The Award Of Full Time M.Tech. P.G. Degree
(WITH EFFECT FROM THE ACADEMIC YEAR 2012-13)

The Jawaharlal Nehru Technological University Anantapur shall confer M.Tech. Post Graduate degree to candidates who are admitted to the Master of Technology Programs and fulfill all the requirements for the award of the degree.

1.0 ELIGIBILITY FOR ADMISSIONS:
   Admission to the above programme shall be made subject to the eligibility, qualifications and specialization prescribed by the University for each programme, from time to time.
   Admissions shall be made either on the basis of merit rank obtained by the qualified candidates at an Entrance Test conducted by the University or on the basis of GATE / PGECET score, subject to reservations prescribed by the University or Government policies from time to time.

2.0 COURSE WORK:
   2.1 A Candidate after securing admission must pursue the M.Tech. course of study for Four semesters duration.
   2.2 Each semester shall be of 20 weeks duration including all examinations.
   2.3 A candidate admitted to a programme should complete it within a period equal to twice the prescribed duration of the programme from the date of admission.

3.0 ATTENDANCE:
   3.1 A candidate shall be deemed to have eligibility to write end semester examinations if he has put in atleast 75% of attendance on cumulative basis of all subjects/courses in the semester.
   3.2 Condonation of shortage of attendance up to 10% i.e., from 65% and above and less than 75% may be given by the college on the recommendation of the Principal.
   3.3 Condonation of shortage of attendance shall be granted only on genuine and valid reasons on representation by the candidate with supporting evidence.
   3.4 If the candidate does not satisfy the attendance requirement he is detained for want of attendance and shall reregister for that semester. He / she shall not be promoted to the next semester.
4.0. EVALUATION:

The performance of the candidate in each semester shall be evaluated subject wise, with a maximum of 100 marks for Theory and 100 marks for practicals, on the basis of Internal Evaluation and End Semester Examination.

4.1 For the theory subjects 60% of the marks will be for the External End Examination. While 40% of the marks will be for Internal Evaluation, based on the better of the marks secured in the two Mid Term-Examinations held, one in the middle of the Semester (I-IV units) and another immediately after the completion of instruction (V-VIII) units with Three questions to be answered out of four in 2hours, evaluated for 40 marks.

*Note: All the Questions shall be of equal weightage of 10 marks and the marks obtained for 3 questions shall be extrapolated to 40 marks, any fraction rounded off to the next higher mark.

4.2 For practical subjects, 60 marks shall be for the End Semester Examinations and 40 marks will be for internal evaluation based on the day to day performance.

4.3 For Seminar there will be an internal evaluation of 50 marks. A candidate has to secure a minimum of 50% to be declared successful. The assessment will be made by a board consisting of HOD and two internal experts at the end of IV semester instruction.

4.4 A candidate shall be deemed to have secured the minimum academic requirement in a subject if he secures a minimum of 40% of marks in the End Examination and a minimum aggregate of 50% of the total marks in the End Semester Examination and Internal Evaluation taken together.

4.5 In case the candidate does not secure the minimum academic requirement in any of the subjects (as specified in 4.4.) he has to reappear for the Semester Examination either supplementary or regular in that subject, or repeat the course when next offered or do any other specified subject as may be required.

5.0 RE-REGISTRATION FOR IMPROVEMENT OF INTERNAL EVALUATION MARKS:

Following are the conditions to avail the benefit of improvement of internal evaluation marks.

5.1 The candidate should have completed the course work and obtained examinations results for I & II semesters.

5.2 He should have passed all the subjects for which the Internal evaluation marks secured are more than 50%.

5.3 Out of the subjects the candidate has failed in the examination due to Internal evaluation marks secured being less than 50%, the candidate shall be given one chance for each Theory subject and for a maximum of three Theory subjects for Improvement of Internal evaluation marks.

5.4 The candidate has to re-register for the chosen subjects and fulfill the academic requirements.

5.5 For each subject, the candidate has to pay a fee equivalent to one third of the semester tuition fee and the amount is to be remitted in the form of D.D. in favour of the
Registrar, JNTUA payable at Anantapur along with the requisition through the Principal of the respective college.

5.6 In the event of availing the Improvement of Internal evaluation marks, the internal evaluation marks as well as the End Examinations marks secured in the previous attempt(s) for the reregistered subjects stand cancelled.

6.0 EVALUATION OF PROJECT WORK:

Every candidate shall be required to submit thesis or dissertation after taking up a topic approved by the college/institute.

6.1 Registration of Project work: A candidate is permitted to register for the project work after satisfying the attendance requirement of all the courses (theory and practical courses of I & II Sem)

6.2 An Internal Departmental Committee (I.D.C) consisting of HOD, Supervisor and one internal senior expert shall monitor the progress of the project work.

6.3 The work on the project shall be initiated in the penultimate semester and continued in the final semester. The duration of the project is for two semesters. The candidate can submit Project thesis with the approval of I.D.C. after 36 weeks from the date of registration at the earliest and one calendar year from the date of registration for the project work. Extension of time within the total permissible limit for completing the programme is to be obtained from the Head of the Institution.

6.4 The student must submit status report at least in three different phases during the project work period. These reports must be approved by the I.D.C before submission of the Project Report.

6.5 A candidate shall be allowed to submit the thesis / dissertation only after passing in all the prescribed subjects (both theory and practical) and then take viva voce examination of the project. The viva-voce examination may be conducted once in two months for all the candidates submitted during that period.

6.6 Three copies of the Thesis / Dissertation certified in the prescribed form by the supervisor & HOD shall be presented to the HOD One copy is to be forwarded to the University and one copy to be sent to the examiner.

6.7 The college shall submit a panel of three experts for a maximum of 5 students at a time. However, the thesis / dissertation will be adjudicated by one examiner nominated by the University.

6.8 If the report of the examiner is favorable viva-voce examination shall be conducted by a board consisting of the Supervisor, Head of the Department and the examiner who adjudicated the thesis / dissertation. The board shall jointly report candidates work as:

1. Very Good Grade A
2. Good Grade B
3. Satisfactory Grade C
4. Not satisfactory Grade D

If the report of the viva-voce is not satisfactory (Grade D) the candidate will retake the viva-voce examination after three months. If he fails to get a satisfactory report at the second viva-voce examination he will not be eligible for the award of the degree unless the candidate is permitted to revise and resubmit the thesis.
7.0 AWARD OF DEGREE AND CLASS:
A candidate shall be eligible for the award of respective degree if he satisfies the minimum academic requirements in every subject and secures ‘satisfactory’ or higher grade report on his thesis/dissertation and viva-voce. Based on overall percentage of marks obtained, the following class is awarded.

- First class with Distinction: 70% or more
- First class: below 70% but not less than 60%
- Second class: below 60% but not less than 50%

8.0 WITH – HOLDING OF RESULTS:

If the candidate has not paid dues to the university or if any case of in-discipline is pending against him, the result of the candidate shall be withheld and he will not be allowed/promoted into the next higher semester. The issue of degree is liable to be withheld in such cases.

9.0 TRANSITORY REGULATIONS:
Candidates who have discontinued or have been detained for want of attendance or who have failed after having undergone the course in earlier regulations and wish to continue the course are eligible for admission into the unfinished semester from the date of commencement of class work with the same or equivalent subjects as and when subjects are offered, subject to 4.5 and 2.3 sections. Whereas they continue to be in the academic regulations they were first admitted.

10.0 GENERAL:

i. The academic regulations should be read as a whole for purpose of any interpretation.

ii. Disciplinary action for Malpractice / improper conduct in examinations is appended.

iii. There shall be no places transfer within the constituent colleges and affiliated colleges of Jawaharlal Nehru Technological University Anantapur.

iv. Where the words “he”, “him”, “his”, occur in the regulations, they include “she”, “her”, “hers”.

v. In the case of any doubt or ambiguity in the interpretation of the above rules, the decision of the Vice-Chancellor is final.

vi. The University may change or amend the academic regulations or syllabi at any time and the changes or amendments shall be made applicable to all the students on rolls with effect from the dates notified by the University.

*****
RULES FOR DISCIPLINARY ACTION FOR MALPRACTICE / IMPROPER CONDUCT IN EXAMINATIONS

<table>
<thead>
<tr>
<th>Nature of Malpractices/Improper conduct</th>
<th>Punishment</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>If the candidate</strong></td>
<td></td>
</tr>
<tr>
<td>1. Possesses or keeps accessible in examination hall, any paper, note book, programmable calculators, Cell phones, pager, palm computers or any other form of material concerned with or related to the subject of the examination (theory or practical) in which he is appearing but has not made use of (material shall include any marks on the body of the candidate which can be used as an aid in the subject of the examination)</td>
<td>Expulsion from the examination hall and cancellation of the performance in that subject only.</td>
</tr>
<tr>
<td>(b) Gives assistance or guidance or receives it from any other candidate orally or by any other body language methods or communicates through cell phones with any candidate or persons in or outside the examination hall in respect of any matter.</td>
<td>Expulsion from the examination hall and cancellation of the performance in that subject only of all the candidates involved. In case of an outsider, he will be handed over to the police and a case is registered against him.</td>
</tr>
<tr>
<td>2. Has copied in the examination hall from any paper, book, programmable calculators, palm computers or any other form of material relevant to the subject of the examination (theory or practical) in which the candidate is appearing.</td>
<td>Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted to appear for the remaining examinations of the subjects of that Semester/year. The Hall Ticket of the candidate is to be cancelled and sent to the University.</td>
</tr>
<tr>
<td>3. Comes in a drunken condition to the examination hall.</td>
<td>Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester/year.</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td>---</td>
<td>---</td>
</tr>
<tr>
<td>4.</td>
<td>Smuggles in the Answer book or additional sheet or takes out or arranges to send out the question paper during the examination or answer book or additional sheet, during or after the examination.</td>
</tr>
<tr>
<td>5.</td>
<td>Leaves the exam hall taking away answer script or intentionally tears of the script or any part thereof inside or outside the examination hall.</td>
</tr>
<tr>
<td>6.</td>
<td>Possess any lethal weapon or firearm in the examination hall.</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td>---</td>
<td>---</td>
</tr>
<tr>
<td>7.</td>
<td>Impersonates any other candidate in connection with the examination.</td>
</tr>
<tr>
<td></td>
<td>The candidate who has impersonated shall be expelled from examination hall. The candidate is also debarred and forfeits the seat. The performance of the original candidate who has been impersonated, shall be cancelled in all the subjects of the examination (including practicals and project work) already appeared and shall not be allowed to appear for examinations of the remaining subjects of that semester/year. The candidate is also debarred for two consecutive semesters from class work and all University examinations. The continuation of the course by the candidate is subject to the academic regulations in connection with forfeiture of seat. If the impostor is an outsider, he will be handed over to the police and a case is registered against him.</td>
</tr>
<tr>
<td>8.</td>
<td>Refuses to obey the orders of the Chief Superintendent/Assistant – Superintendent / any officer on duty or misbehaves or creates disturbance of any kind in and around the examination hall or organizes a walk out or instigates others to walk out, or threatens the officer-in charge or any person on duty in or outside the examination hall of any injury to his person or to any of his relations whether by words, either spoken or written or by signs or by visible representation, assaults the officer-in-charge, or any person on duty in or outside the examination hall or any of his relations, or indulges in any other act of misconduct or mischief which result in damage to or destruction of property in the examination hall or any part of the College campus or engages in any other act which in the opinion of the officer on duty amounts to use of unfair means or misconduct or has the tendency to disrupt the orderly conduct of the examination.</td>
</tr>
<tr>
<td></td>
<td>In case of students of the college, they shall be expelled from examination halls and cancellation of their performance in that subject and all other subjects the candidate(s) has (have) already appeared and shall not be permitted to appear for the remaining examinations of the subjects of that semester/year. The candidates also are debarred and forfeit their seats. In case of outsiders, they will be handed over to the police and a police case is registered against them.</td>
</tr>
<tr>
<td>No.</td>
<td>Description</td>
</tr>
<tr>
<td>-----</td>
<td>-------------</td>
</tr>
<tr>
<td>9.</td>
<td>If student of the college, who is not a candidate for the particular examination or any person not connected with the college indulges in any malpractice or improper conduct mentioned in clause 6 to 8.</td>
</tr>
<tr>
<td></td>
<td>Student of the colleges expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester/year. The candidate is also debarred and forfeits the seat. Person(s) who do not belong to the College will be handed over to police and a police case will be registered against them.</td>
</tr>
<tr>
<td>10.</td>
<td>Uses objectionable, abusive or offensive language in the answer paper or in letters to the examiners or writes to the examiner requesting him to award pass marks.</td>
</tr>
<tr>
<td></td>
<td>Cancellation of the performance in that subject.</td>
</tr>
<tr>
<td>11.</td>
<td>Copying detected on the basis of internal evidence, such as, during valuation or during special scrutiny.</td>
</tr>
<tr>
<td></td>
<td>Cancellation of the performance in that subject and all other subjects the candidate has appeared including practical examinations and project work of that semester/year examinations.</td>
</tr>
<tr>
<td>12.</td>
<td>If any malpractice is detected which is not covered in the above clauses 1 to 11 shall be reported to the University for further action to award suitable punishment.</td>
</tr>
</tbody>
</table>

**Malpractices identified by squad or special invigilators**

1. Punishments to the candidates as per the above guidelines.
2. Punishment for institutions: (if the squad reports that the college is also involved in encouraging malpractices)
   (i) A show cause notice shall be issued to the college.
   (ii) Impose a suitable fine on the college.
   (iii) Shifting the examination centre from the college to another college for a specific period of not less than one year.

2. **HAMILTON PRINCIPLE** – Lagranges equations generalized dynamic exitations- constraints in dynamical systems.

3. **NUMERICAL SOLUTION OF ORDINARY DIFFERENTIAL EQUATIONS**

4. **NUMERICAL SOLUTION OF PARTIAL DIFFERENTIAL EQUATIONS** – Elliptical equations standard five point formula, diagonal five point formula – solution of Laplace equation by Leibmann’s iteration method, Poisson’s equation.

7. **& 8 INTRODUCTION TOFINITE ELEMENT METHOD** – weighted Residual methods, least square method, Galerkin’s method – Finite elements – Inter polating over the whole domain – one dimensional case, two dimensional case – application to boundary value problems.
TEXT/REFERENCE BOOKS:

1. INDETERMINACY - Determination of static and kinematic indeterminacies of two-dimensional and three-dimensional portal frames, pin jointed trusses and hybrid frames-coordinate systems – structural idealization.

3 & 4. ANALYSIS OF CONTINUOUS BEAMS - stiffness method and flexibility method of analysis – continuous beams of two and three spans with different end conditions-internal hinges.

5. ANALYSIS OF TWO DIMENSIONAL PORTAL FRAMES – stiffness and flexibility method of analysis of 2D portal frames with different end conditions-plotting of bending moment diagrams.

6. ANALYSIS OF TWO-DIMENSIONAL PINJOINTED TRUSSES - stiffness and flexibility methods - computation of joint displacement and member forces.

8. EQUATION SOLVERS - solution of system of linear algebraic equations-direct inversion method-gauss elimination method-Cholesky method-banded equation solvers-frontal solution technique.
TEXT/REFERENCE BOOKS:

1. Cotes, R.C., Couties, M.G., and Kong, F.K., Structural Analysis, ELBS.
4. Structural Analysis by Pundit & Gupta
6. Structural Analysis – R.C. Hibbeler
(12D20103) THEORY OF ELASTICITY AND PLASTICITY

1. INTRODUCTION:
Elasticity – Notation for forces and stresses - Components of stresses – components of strain – Hooke’s law.

2. PLANE STRESS AND PLANE STRAIN ANALYSIS:
Plane stress-plane strain - Differential equations of equilibrium - Boundary conditions - Compatibility equations - stress function - Boundary conditions.

3. TWO DIMENSIONAL PROBLEMS IN RECTANGULAR COORDINATES:
Solution by polynomials - Saint Venant’s principle - Determination of displacements - bending of simple beams - application of Fourier series for two dimensional problems - gravity loading.

4. TWO DIMENSIONAL PROBLEMS IN POLAR COORDINATES:
General Equation in polar co-ordinates - stress distribution symmetrical about an axis – Pure bending of curved bars - strain components in polar coordinates - Displacements for symmetrical stress distributions - simple symmetric and asymmetric problems - General solution of two dimensional problem in polar coordinates - Application of the general solution of two dimensional problem in polar coordinates - Application of the general solution in polar coordinates.

5. ANALYSIS OF STRESS AND STRAIN IN THREE DIMENSIONS:

6. GENERAL THEOREMS:
7. TORSION OF PRISMATICAL BARS:
Torsion of prismatic bars- Elliptical cross section- other elementary solutions-membrane analogy- Torsion of rectangular bars- solution of torsional problems by energy method- use of soap films in solving torsional problems- hydro dynamical analogies- Torsion of shafts, tubes, bars etc.

8. THEORY OF PLASTICITY:
Introduction- concepts and assumptions- yield criterions.

TEXT/REFERENCE BOOKS:

1. DERIVATION OF PLATE EQUATIONS – In plane bending and transverse bending effects.

2. RECTANGULAR PLATES: Plates under various loading conditions like concentrated, U.D.L and hydrostatic pressure - Navier and Levy’s type of solutions for various boundary conditions.

3 & 4. CIRCULAR PLATES: Symmetrically loaded, circular plates under various loading conditions, annular plates.

5. PLATES UNDER SIMULTANEOUS BENDING AND STRENGTH: Derivation of the governing equation and application to simple cases.

6. ORTHOTROPIC PLATES: Derivation of the governing equation, applications to grillage problems as equivalent orthotropic plates.

7. NUMERICAL AND APPROXIMATE METHODS: Energy solutions by variational methods, finite difference and finite element methods of analysis for plate problems.

8. LARGE DEFLECTION THEORY OF PLATES: Study of few simple cases.

REFERENCE BOOKS:

3. ELECTRICAL STRAIN GAUGES: - Inductance strain gauges - LVDT - Resistance strain gauges - various types - Gauge factor - Materials of adhesion base etc…

4. STRAIN ROSETTES: - Introduction - The three element Rectangular Rosette - The Delta Rosette - Corrections for Transverse Strain Gauge.

5. NON-DESTRUCTIVE TESTING: - Ultrasonic Pulse Velocity method - Application to Concrete. Hammer Test - Application to Concrete.

Reference Books :-
1. Experimental stress analysis by J.W. Dally and W.F. Riley
2. Experimental stress analysis by Dr. Sadhu Singh.
1. DEFLECTION OF REINFORCED CONCRETE BEAMS AND SLABS:
   Introduction - Short-term Deflection of beams and Slabs - Deflection due to Imposed loads - Short-term deflection of beams due to applied loads - Calculation of deflection by IS 456 - Calculation of deflection by BS 8110 - Deflection calculation by Eurocode - ACI Simplified Method - Deflection of continues beams by IS 456 - Deflection of Cantilevers - Deflection of Slabs

2. ESTIMATION OF CRACKWIDTH IN REINFORCED CONCRETE MEMBERS:
   Introduction - Factors affecting Crackwidth in beams - Mechanism of Flexural cracking - Calculation of crack widths - Simple Empirical method - Estimation of Crackwidth in beams by IS 456 of BS 8110 - Shrinkage and Thermal Cracking

3. DESIGN OF REINFORCED CONCRETE DEEP BEAMS:
   Introduction - Minimum Thickness - Steps of Designing deep beams - Design by IS 456 - Design according to British Practice - ACI Procedure for design of deep beams - Checking for local failures - Detailing of deep beams

4. SHEAR IN FLAT SLABS AND FLAT PLATES:
   Introduction - Checking for One-way (wide beam) shear - Two-way (Punching) shear - Permissible punching shear - Shear due to Unbalanced Moment (Torsional moments) - Calculation of j values - Strengthening of column areas for moment transfer by torsion which produces shear - Shear Reinforcement Design - Effect of openings in Flat slabs - Recent Revisions in ACI 318 - Shear in Two – way Slabs with beams.

5. DESIGN OF PLAIN CONCRETE WALLS:
   Introduction - Braced and Unbraced walls - Slenderness of walls - Eccentricities of vertical loads at Right angles to wall - Empirical design method for plane concrete walls carrying axial load - Design of walls for In-plane Horizontal forces - Rules for detailing of steel in concrete walls
6. DESIGN OF SHEAR WALLS:
   Introduction - Classification of shear walls - Classification according to behavior - Loads in shear walls - Design of Rectangular and flanged shear walls - Derivation of formula for moment of Resistance of Rectangular shear walls

7. DESIGN OF REINFORCED CONCRETE MEMBERS FOR FIRE RESISTANCE:
   Introduction - ISO 834 standard heating conditions - Grading or classifications - Effect of High temperature on steel and concrete - Effect of high temperatures on different types of structural members - Fire resistance by structural detailing from Tabulated data - Analytical determination of the ultimate bending moment capacity of reinforced concrete beams under fire - Other considerations

TEXT/REFERENCE BOOKS:

FIRST SEMESTER

1. a) HOUSING SCENARIO
   Introduction - Status of urban housing - Status of Rural Housing

   b) HOUSING FINANCE:
   Introduction to - Existing finance system in India - Government role as facilitator
   - Status of Rural Housing Finance - Impediments in housing finance and related issues

2. a) LAND USE AND PHYSICAL PLANNING FOR HOUSING
   Introduction - Planning of urban land - Urban land ceiling and regulation act -
   Efficiency of building bye laws - Residential Densities

   b) HOUSING THE URBAN POOR
   Introduction - Living conditions in slums - Approaches and strategies for housing urban poor

3. DEVELOPMENT AND ADOPTION OF LOW COST HOUSING TECHNOLOGY
   Introduction - Adoption of innovative cost-effective construction techniques -
   Adoption of precast elements in partial prefatroices - Adopting of total prefactcation of mass housing in India -
   General remarks on pre cast roofing/flooring systems - Economical wall system - Single Brick thick load bearing wall -
   19cm thick load bearing masonry walls - Half brick thick load bearing wall - Flyash gypsym brick for masonary - Stone Block masonry -
   Adoption of precast R.C. plank and join system for roof/floor in the building

4. ALTERNATIVE BUILDING MATERIALS FOR LOW COST HOUSING
   Introduction - Substitute for scarce materials – Ferrocement - Gypsum boards -
   Timber substitutions - Industrial wastes - Agricultural wastes - Alternative building maintenance
5. **LOW COST INFRASTRUCTURE SERVICES:**
Introduction to - Present status - Technological options - Low cost sanitation - Domestic wall - Water supply, energy

6. **RURAL HOUSING:**
Introduction to traditional practice of rural housing-continuous Mud Housing technology
Mud roofs - Characteristics of mud - Fire treatment for thatch roof - Soil stabilization - Rural Housing programs

7&8. **HOUSING IN DISASTER PRONE AREAS**
Introduction – Earthquake - Damage to houses - Disaster prone areas - Type of Damages and Repairs of non-engineered buildings - Repair and restoration of earthquake Damaged non-engineered buildings recommendations for future constructions Requirement’s of structural safety of thin precast roofing units against Earthquake forces Status of R&D in earthquake strengthening measures - Floods, cyclone, future safety

**TEXT BOOKS**

5. Low cost Housing – G.C. Mathur.
ELECTIVE-II
(12D20106a) PRESTRESSED CONCRETE

1. INTRODUCTION: Development of prestressed concrete—Advantages and Disadvantages of PSC over RCC—General principles of pre-stressing—pre tensioning and post tensioning—Materials used in PSC—high strength concrete—High tension steel—Different types/methods/systems of prestressing.

2. LOSSES OF PRESTRESS: Estimation of the loss of prestress due to various causes like elastic shortening of concrete, creep of concrete, shrinkage of concrete, relaxation of steel, slip in anchorage, friction etc.

3. FLEXURE: Analysis of sections for flexure in accordance with elastic theory—Allowable stresses—Design criteria as per I.S code of practice—Elastic design of Beams (rectangular, I and T sections) for Flexure—Introduction to partial prestressing.

4 & 5. SHEAR, BOND, BEARING AND ANCHORAGE: shear in PSC beams—Principal stresses—Conventional elastic design for shear—transfer of prestress in pretensioned members—transmission length—Bond stresses—bearing at anchorage—Anchorage zone stresses in post-tensioned members—Analysis and design of end blocks by Guyon, Magnel and approximate methods—Anchorage zone reinforcements.

REFERENCE BOOKS:
1. Prestressed Concrete by S. Krishnam raju
2. Prestressed Concrete by S. Ramamrutham
7. Edward P.Nawy, Prentise Hall – Prestressed Concrete.
1. **GENERAL**: Quality assurance for concrete construction. As built concrete properties, strength, permeability, volume changes, thermal properties, cracking.

2. **INFLUENCE ON SERVICEABILITY AND DURABILITY**: Effects due to climate, temperature, chemicals, wear and erosion, design and construction errors, corrosion mechanism, Effects of cover thickness and cracking, methods of corrosion protection, inhibitors, resistant steels, coatings cathodic protection.

4&5 **MATERIALS FOR REPAIR**: Special concretes and mortar, concrete chemicals, special elements for accelerated strength gain, Expansive cement, polymer concrete, sulphur infiltrated concrete, ferro cement, Fibre reinforced concrete.

6&7. **TECHNIQUES FOR REPAIR & RETROFIT**: Rust eliminators and polymers coating for rebars during repair, foamed concrete, mortar and dry pack, vacuum concrete, Gunite and shotcrete Epoxy injection, Mortar repair for cracks, shoring and underpinning, Fibre reinforced polymer

8. **CASE STUDIES**: Repairs to overcome low member strength, Deflection, cracking, chemical disruption, weathering, wear, fire, leakage, marine exposure.
TEXT/REFERENCE BOOKS:

2. RT. Allen and S.C. Edwards, Repair of concrete Structures, Blakie and sons, UK.
3. MS. Shetty, Concrete Technology – Theory and practice, S.Chand and company, New Delhi.
4. Santhakumar, A.R. Training Course notes on damage assessment and Repair in low cost housing RHDC-NBO Anna University, Madras.
6. N. Palaniappan, Estate Management, Anna Institute of Management, Madras.
7. F.K. Garas, J.L. Clarke, GST Armer, Structural Assessment, Butterworths, UK.
1&2. SHALLOW FOUNDATIONS-I: General requirements of foundations, types of shallow foundations and the factors governing the selection of type of shallow foundation. Bearing capacity of shallow foundations by Terzaghi’s theory and Meyerhof’s theory (derivation of expressions and solution to problems based on these theories). Local shear and general shear failure and their identification.

3. SHALLOW FOUNDATIONS-II: Bearing capacity of isolated footing subjected to eccentric and inclined loads. Bearing capacity of isolated footing resting on stratified soils-Button’s theory and Siva reddy analysis. Analysis and structural design of R.C.C isolated, combined and strap footings.

5. DEEP FOUNDATIONS-II: Well foundations—Elements of well foundation. Forces acting on a well foundation. Depth and bearing capacity of well foundation. Design of individual components of well foundation (only forces acting and principles of design). Problems associated with well sinking.

6. SHEET PILE WALLS: Cantilever sheet piles and anchored bulkheads, Earth Pressure diagram, Determination of depth of embedment in sands and clays—Timbering of trenches—Earth Pressure diagrams—forces in struts.

TEXT BOOKS:

Reference Books:
- Analysis and Design of Foundations-J.E.Bowles
- Foundation Design and Construction-Tomlinson
- Foundation Design-Teng.
- Geotechnical Engg – C.Venkatramaiah
List of Experiments:

1. Workability
   (a) Slump Test
   (b) Compaction Factor Test
   (c) Vee-Bee Test
2. Flakiness Test
3. Elongation Test
4. Specific Gravity of
   (a) Cement
   (b) Coarse Aggregate
   (c) Fine Aggregate
5. Bulk density of
   (a) Fine Aggregate
   (b) Coarse Aggregate
6. Fineness Modulus of
   (a) Fine Aggregate
   (b) Coarse Aggregate
7. Compressive strength of Cement
8. Mix Design of Concrete and Casting of Specimen.
9. Young’s Modulus of Concrete
10. Fineness by Blain’s apparatus for cement, fly ash, Silica.

2. INTRODUCTION TO STRUCTURAL DYNAMICS: Fundamental objective of dynamic analysis-types of prescribed loading- Methods of discretization- Formulation of the equations of motion.

8. CONTINUOUS SYSTEM: Introduction – Flexural vibrations of beams- Elementary case- Equation of motion – Analysis of undamped free shapes of simple beams with different end conditions- principles of application to continuous beams.
REFERENCE BOOKS:
- Dynamics of structures by Clough & Penziem
- Structural dynamics by Mario Paz
- I.S:1893(latest)“ code of practice for earthquakes resistant design of structures”
- Anderson R.A fundamentals of vibration, Amerind Publishing Co.,
- R. Narayana Iyangar, Theory of Vibrations.

2. ELASTIC FORMULATIONS: Stress equations - strain displacement relationships in matrix form - plane stress, plane strain and Axi-symmetric bodies of revolution with axi-symmetric loading.

3. ONE DIMENSIONAL FEM - Stiffness Matrix for Beam and Bar elements shape functions for ID elements – static condensation of global stiffness matrix - solution – Initial strain and temperature effects.

8. THREE DIMENSIONAL FEM - Different 3-D elements, 3D strain – displacement relationship - formulation of hexahedral and isoparametric solid element.
REFERENCE BOOKS:

- Finite element method by O.C. Zienkiewicz
- Finite element analysis - Theory & programming by G.S. Krishna Murthy
- Introduction to finite element method – Tirupathi Chandra Panla & Belugunudu
- Introduction to finite element method – J.N. Reddy
- Bathe K.J., Finite Element Procedures in Engineering Analysis, Prentice Hall.
- Finite element methods by P. Seshu.
(12D20203) STABILITY OF STRUCTURES

3. FORMULATIONS RELATED TO BEAM COLUMNS: Concept of Stability, Differential equation for beam columns – Beam column with concentrated loads – Continuous lateral load – Couples – Beam column with built in ends – Continuous beams with axial load – Application of Trignometric series – Determination of allowable stresses.

4. INELASTIC BUCKLING: Buckling of straight bars – Double modulus theory – Tangent modulus theory

5. MATHEMATICAL TREATMENT OF STABILITY PROBLEMS: Buckling problem orthogonality relation – Ritz method – Timoshenko method, Galerkin method

6. TORSIONAL BUCKLING: Pure torsion of thin walled bar of open cross section – Non-uniform torsion of thin walled bars of open cross section – Torsional buckling – Buckling under Torsion and Flexure.

7. LATERAL BUCKLING OF SIMPLY SUPPORTED BEAMS: Beams of rectangular cross section subjected for pure bending

8. BUCKLING OF SIMPLY SUPPORTED RECTANGULAR PLATES: Derivation of equation of plate subjected to constant compression in two directions and one direction.
REFERNCE BOOKS:

- Stability of metallic structure by Bleich – Mc Graw hill
- Smitses, Elastic stability of structures, Prentice Hall.
- Ashwini Kumar, stability theory of structures, TATA Mc Graw Hill publishing company Ltd, New Delhi.
- Elastic stability by Bleaigh.
(12D20204) ANALYSIS OF SHELLS AND FOLDED PLATES

2 & 3. CYLINDRICAL SHELLS: Derivation of governing DKJ equation for bending theory, details of Schorer’s theory, Applications to the analysis and design of short shells and long shells. Introduction of ASCE manual co-efficients for design.

4 & 5. INTRODUCTION TO SHELLS OF DOUBLE CURVATURE: (other than shells of revolution:) Geometry and analysis of elliptic paraboloid, rotational paraboloid and hyperbolic paraboloid shapes by membrane theory.

6. FOLDED PLATES: Folded plate theory, plate and slab action, Whitney’s theory, Simpson’s theory for the analysis of different types of folded plates (Design is not included)

7 & 8. SHELLS OF DOUBLE CURVATURE - Surfaces of revolution. Derivation of equilibrium equations by membrane theory, Applications to spherical shell and rotational Hyperboloid

TEXT / REFERENCE BOOKS:

1. **INTRODUCTION** – Classification, investigations and planning, choice of type – economic span length – IRC specifications for road bridges, standard live loads, other forces acting on bridges, general design considerations.

3. **DESIGN OF SLAB BRIDGES** – Effective width of analysis – workings stress design and detailing of slab bridges for IRC loading.

**TEXT/REFERENCES**:

**TEXT/REFERENCE BOOKS:**

6. P.K.Mehta – Concrete Technology
7. Concrete Technology: Krishna Raju
1. **ENGINEERING SEISMOLOGY:**

2. **VIBRATION OF STRUCTURES UNDER GROUND MOTION:**
   Elastic vibration of simple structures – modelling of structures and equations of motion – free vibrations of simple structures – steady state forced vibrations – Response spectrum representations; Relation between the nature of the ground motion and structural damage.

3&4. **DESIGN APPROACHES:** Methods of analysis – selection of analysis – equivalent lateral force procedure seismic base shear – seismic design co-efficient - vertical distribution of seismic forces and horizontal shear – twisting moment - Over turning moment – vertical seismic load and orthogonal effects lateral deflection – P- Δ characteristics effect – soil structure Interaction
   Earthquake records for design – factors affecting Accelerogram characteristics - artificial Accelerogram – zoning map.

5&6. **EARTHQUAKE – RESISTANT DESIGN OF STRUCTURAL COMPONENTS AND SYSTEMS:**
7&8. FUNDAMENTALS OF SEISMIC PLANNING: Selection of materials and types of construction form of superstructure – framing systems and seismic units – devices for reducing. Earthquake loads,

TEXT / REFERENCE BOOKS:

- Design of earthquake resistant structures by Minoru Wakabayashi.

- I.S.Codes No. 1893,4326,13920.
- Earthquake Resistant Design by Pankaj Agarwal & Manish Shrikande, Printice Hall Publishers.
1. **DESIGN OF SELF SUPPORTING STACKS/CHIMNEYS** – Considerations for preliminary design (industrial requirements – thermal requirement – mechanical force requirement – wind load and dead load estimation) – Detailed estimation of wind; dead-and other accidental – loads; Analysis; Detailed design including provision of stakes /spoilers – Design of super structure only.

2&3. **ANALYSIS OF MULTI-STOREYED FRAMES USING APPROXIMATE METHODS**
   
a) Cantilever method &  
b) Portal method

4. **ANALYSIS OF MULTI-STOREY FRAMES USING SUBSTITUTE FRAME METHOD.**

5. **DESIGN OF GANTRY GIRDER** – Introduction – Loads acting on the gantry girder – permissible stresses - types of gantry girders and crane sails – crane data – maximum moments and shears – design procedure (restricted to electrically operated cranes)

6. **THEOREMS OF PLASTIC ANALYSIS, APPLICATIONS TO THE CASES OF RECTANGULAR PORTAL FRAMES.**

7. **GENERAL METHODS OF PLASTIC DESIGN:** combining mechanics methods, plastic moment redistribution method; Application to few cases of simple two storied rectangular portal frames including estimation of deflection.

8. **PRINCIPLES OF OPTIMIZATION IN STRUCTURAL DESIGN** – Application to simple – rectangular portal frame – minimum weight design.
BOOKS FOR REFERENCE:

1. Plastic analysis of structures by B.G. Neal
2. Steel Skeleton V.I and II by Baker
3. Design of steel structures by Vazarani and Ratwani
4. Strength of materials (Vol-II) by Timoshenko.
5. Analysis of Steel Structure by Manohar.
6. Analysis of Steel Structure by Pinfold
7. Analysis of Steel Structure by Arya & Azmani
8. Analysis of Steel Structure by Relevant IS codes.
9. Analysis of Steel Structure by Punmia, B.C.
JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY ANANTAPUR
M.Tech II semester (SE)

(ELECTIVE-IV)
(12D20206b) BUILDING CONSTRUCTION MANAGEMENT

Unit-I & II

Unit-III:
CONSTRUCTION PRACTICES – Time Management – bar chart, CPM, PERT – Progress report

Unit –IV:
RESOURCES MANAGEMENT AND INVENTOR- Basic concepts equipment management, material management inventory control.

Unit-V & VI:
ACCOUNTS MANAGEMENT – Basic concepts, Accounting system and book keeping, depreciation, Balance sheet, profit and loss account, internal auditing. Quality control by statistical methods, sampling plan and control charts, safety requirements.

Unit-VII & VIII:
REFERENCE:

1. Construction Management and planning by B. Sengupata and H. Gula (Tata McGraw Hill)
2. Construction Management by Atkinson (Elsevier)
3. In principle land practice by EEC beech (Longman)
1. SUMMARY OF BASIC PROBLEMS AND CONCEPTS:
   Introduction - A crack in a structure - The stress at a crack tip - The Griffith criterion - The crack opening displacement criterion - Crack Propagation - Closure

2. THE ELASTIC CRACK – TIP STRESS FIELD:
   The Airy stress function - Complex stress functions - Solution to crack problems - The effect of finite size - Special cases - Elliptical cracks - Some useful expressions

3. THE CRACK TIP PLASTIC ZONE:
   The Irwin plastic zone correction - The Dugdale approach - The shape of the plastic zone - Plane stress versus plane strain - Plastic constraint factor - The thickness effect

4. THE ENERGY PRINCIPLE:
   The energy release rate - The criterion for crack growth - The crack resistance (R curve) - Compliance - The J integral (Definitions only)

5. PLANE STRAIN FRACTURE TOUGHNESS:
   The standard test - Size requirements - Non-Linearity - Applicability

6. PLANE STRESS AND TRANSITIONAL BEHAVIOUR:
   Introduction - An engineering concept of plane stress - The R curve concept

7. THE CRACK OPENING DISPLACEMENT CRITERION:
   Fracture beyond general yield - The crack tip opening displacement - The possible use of the CTOD criterion

8. DETERMINATION OF STRESS INTENSITY FACTORS:
   Introduction - Analytical and numerical methods - Finite element methods, Experimental methods (An Ariel view only)
REFERENCES:
1. Elementary engineering fracture mechanics - David Broek, Battelle, columbus laboratories, columbus, Ohieo, USA
2. Fracture and Fatigue Control in Structures - John M. Barsom, Senior consultant United States Steel corporation & Stanley T. Rolfe, Ross H. Forney Professor of Engineering University of Kansas. & Stanley T. Rolfe, Ross H. forney Professor of Engineering, University of Kansas
(12D20207) CONCRETE LABORATORY-II

1. Accelerated curing test on Concrete cubes.
2. Non destructive test on concrete.
4. Mix design of high strength concrete including casting and testing of specimens.
5. Mix design of fly ash concrete including casting and testing of specimens.
8. Bending test on a RCC beam under.
   a) single point load
   b) Three point load
